Dear Mr Kagawa,

### **WHO's Emergency Health Response in Haiti**

Six months have already passed since 12 January when a devastating earthquake hit Haiti leaving hundreds of thousands of people dead and over one million displaced. I am pleased to share with you two reports prepared by the Pan American Health Organization/ World Health Organization which describe the health sector response activities following the earthquake.

As you will read in the reports, timely and generous support from the international community enabled WHO and health cluster partners to address the health needs of the Haitian people affected by the disaster.

I would like to express our sincere appreciation for the valuable contribution of the Japan Private Kindergarten Association to the efforts of the World Health Organization in the field of emergency and humanitarian action.

Yours sincerely,

Dr Daniel López-Acuña  
Director, Department of Strategy, Policy and  
Resource Management (SPR)  
Health Action in Crises

Encl.: As stated
